

Drive ROI and lower TCO using the platforms and devices you already have. Tight integration with the Avava Aura® Platform, Avaya Communication Server 1000, and Avaya IP Office turns basic IM, presence and browsing applications into enterprise class telephony and real time collaboration tools while maintaining the appearance and functions of the original interface.

# **Avaya Communicator for** Microsoft Lync

The performance and capabilities you want. The platforms and devices you already have.

### Overview

With growing communication demands, many organizations are putting top priority on improving the capabilities of their products and services. Unified communication components including enterprise class telephony, real-time audio, video and web collaboration, voice messaging and mobility applications are considered must have technologies for bringing customers, partners and employees together. However implementing new platforms and applications can mean replacing current investments, spending more money, and frustrating employees with new training and unfamiliar technology.

Avaya Communicator for Microsoft Lync provides an easier and cost-effective way to transition to the performance and capabilities you want through simple out-of-the-box integration with Microsoft Lvnc. Microsoft Office. Microsoft Outlook, Sharepoint, and Microsoft Internet Explorer, Mozilla Firefox and Google Chrome web browsers. Seamless integration with the Avaya Aura platform extends a full suite of unified communications and

collaboration applications to users, providing the performance and capabilities you want to boost productivity.

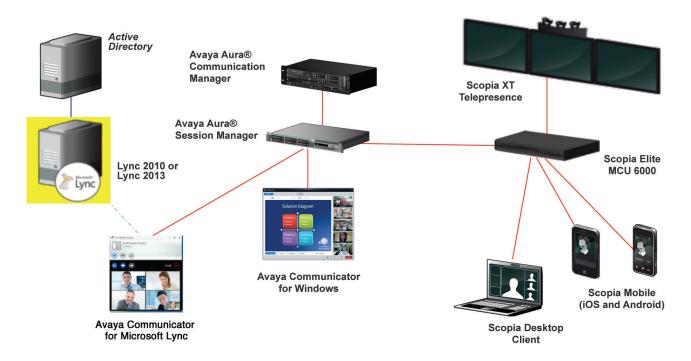

### **Key Customer Benefits**

- Full suite UC and telephony tools: Supports productivity across the enterprise. Mid-call controls and integration with corporate directories allow users to work faster, share more information and communicate more effectively.
- End-to-end open standards video: Integration with the Avaya Aura platform and Avaya Scopia® video solutions extends easy-to-use ad hoc or scheduled face-to-face video to employees, partners and customers, enhancing internal and B2B relationships.
- Audio conferencing and web collaboration: Reduce OPEX by bringing conferencing in-house. Leverage Avaya Aura Conferencing for real-time collaboration with white boards, desktop share, extensive moderator features and controls. helping drive faster decision making.

- Increase ROI and lower TCO: Leverage your existing investments in the Avaya Aura platform, Communication Server 1000, and IP Office. Extend Scopia video and Avaya Aura Conferencing to more users. Leverage your existing Avaya desktops (SIP and H.323) and soft clients as well as the Microsoft stack.
- Enable cost reduction and preserve dial plans: Maintain your existing Avaya Aura dial plan configuration. Eliminate costs associated with Microsoft voice licenses and related devices. Avaya integration requires only Microsoft Lync standard client access licensing.

- Simplified packaging: Avaya Communicator for Microsoft Lync is a core entitlement of the Avaya Aura Suite Licensing - Core Suite.
- Flexible deployment: Deploy in a Citrix or VMware VDI environment with support for the Avaya Deskphones or Avaya VDI Communicator client. Integration with Microsoft Lync CPE or Microsoft Office 365 allows organizations to deploy as part of a Microsoft on-premise system or as a hosted Microsoft Office service.
- Performance and quality: Signature five 9s + availability and N+1 resiliency scales globally. Media cascading helps reduce bandwidth consumption.

## Avaya Communicator for Microsoft Lync with Avaya Aura Platform and Avaya Scopia Video Solutions
